The Third is a second case of the control of the co

On Fraser River several Important sales are pending of mining property that is furnished with stamp mills that are in condition to operate at once. It is asserted there are millions of tons in sight, the ore going from \$5 to \$15 per ton. Prospectors have been in the field for the past year and their success has been all that could be desired. Capital has been slow to take hold of this property, regardless of its easy access and the vast amount of ore. It is predicted this ore will be crushed at \$1 per ton before the expiration of the year. The coal is within easy transportation and is very abundant at low prices.

WASHINGTON.

SEATTLE, May 9.— The Milwaukee and Seattle Enilway has decided to take the Ellensburg route through the Cascade Range. This adds new interest to one of the richest and most attractive sections of the State of Washington, rich in all the minerals, gold, silver, copper and lead, with an abundance of iron and copper now opening up.

of irot and copper now opening up.

NEVADA.

GOLDFIELD. May 9. Since the middle of last week business has been in full swing here again. Good support has been given the stock market, and the fear that the San Francisco misfortune will be seriously reflected in operations in the camps of this State is rapidly subsiding. The rich strikes made in the Mohawk property have sent the company's stock to par, this making the sixth Goldfield company that has seen its stock advance from a few pennies to \$1 and be "er. The Combination was the first, Florence second, Jumbo third, Red Top fourth, Sandstorm fifth and now the Mohawk.

Rich sylvanite ore was encountered in the Great Bend this week and reports from the property all indicate that it is destined to rival, if not outrank, the sensational per-

storm fifth and now the Mohawk.

Rich sylvanite ore was encountered in the Great Bend this week and reports from the property all indicate that it is destined to rival, if not outrank, the sensational performances of the Sandstorm before the present year is over.

Eighteen inches of \$200 ore has been uncovered in the Goldfield-Daisy. The ore has been stripped for a distance of twenty-five feet at a depth of six feet from the surface. George Wingfield and associates will soon begin the prospecting of Columbia Mountain at depth with a diamond drilling outfit, the installation of which will cost them \$20,000.

Cherry Ceek, May B.—Reports from the north are to the effect that rather slow progress is being add in the construction of the Nevada Northern allroad from the Southern Palitoad from the South, however, and more rapid progress should be made from now on. Within a week or so the line should be completed to Curry's ranch, twenty-live miles north of here and about seventy-five niles from Ely. The Hartford-Nevada Company, which recently made a trial shipment of ore from its properties a few miles out of this lace, got paid for the lot by the Salt Lake smelters at the rate of \$2,000 a ton. The ere carried a little over 147 ounces in gold and over forty-one ounces silver per ton.

This camp is now being visited daily by mining men from Ely, while a few find their way in here from Tonno, on the Southern Pacific. It is realized that the big companies of Ely are going to monopolize business there and on that account a great deal of attention is now being paid to the unines of this section. Yekhottor and men from Tonnopah, Goldfield and several others have also located some fine claims. M. J. Mooney, one of the party has gone out to Tonopah and during his absence will make arrangements for the party has gone out to Tonopah and during his absence will make arrangements for the party has gone out to Tonopah and during his absence will make arrangements for the party has gone of the properties acquired by the crowd about

of the new town.

Af

This will leave the company free to develop

portion of the Lexington Hill company's ore.

This will leave the company free to develop its property, while at the same time some of the ore will be treated and a revenue obtained from the mill without the cost of operating it. The new lessees of this mill will also treat, custom ore from other. Spruce Gulch properties. The mill is a wet cyanide mill with a capacity of 200 tons daily and a complete equipment. This company has been organized a number of years and the ground is fairly well developed. It comprises 350 acres, and the main tunnel has been run in 360 feet. This will be used as a working tunnel and the ore will be taken from the stopes. The ore deposit is extensive and carries high values.

The mill at the Clara Bell, at Custer, will be completed within the next three weeks, so far as the stamp mill is concerned. A few weeks longer will be required in order to put in the cyanide tanks and to complete that annex. A classifier for the purpose of separating the sands from the slimes is being put in, and it is now estimated that these tailings will assay not less than 39 a ton. At the mine the new working shaft has reached a depth of 350 feet. It will be sumk until it encounters the ore body, when drifts will be run and stoping will be commenced.

The Homestake Extension Company is now planning to sink two shafts, each to the depth of 350 feet. So far the exploratory work has been through a tunnel and eight crosscuts, but this has developed the ore on the upper levels alone. One shaft will now be sunk at about the centre of the property and will be connected by a tunnel with the New England shaft across the gulch. This will be the working shaft and the other will be used temporarily ior ventilating purposes. A much large force of men will be put to work in a few days as soon as arrangements have been made for beginning this work. In that time the contracts for the mill will be let. In a few days as soon as arrangements have been made for beginning this work. In that time the contracts for the mill will be let. Supt. McHugh also plans to put in large bins at the bottom of the New England shaft for both this property and the Homestake Extension property.
